CISILION ▦ Microsoft Security

Cybersecurity Assessment

Understand your readiness for common security threats

Engagement highlights

Identify a baseline of your organisation's cybersecurity policies

Use Microsoft Security capabilities to generate an overview of areas of focus

Map baseline and security scan results to common threat scenarios

Develop joint plans and next steps

Human-operated Ransomware and data leaks from insider threats are two of the most prevalent security risks that organisations are facing. Over 98% of these attacks can be prevented by having basic security hygiene processes and solutions in place[1]. How aware is your organisation of the policies and activities that can help to strengthen your cybersecurity posture?

Improve your security awareness with a Cybersecurity Assessment

Organisations today are addressing security threats from numerous locations while having to work with multiple stakeholders both within and outside of their organisation to maintain compliance with various industry and regional regulations. Get a jump start on improving your security posture, with Microsoft Security solutions, by scheduling a Cybersecurity Assessment.

We can help you develop a strategic > ;g, customised for your organisation and based on the recommendations of Microsoft experts in security. Gain awareness of the current state of your security aligned to industry benchmarks, and support on how to remediate vulnerabilities and upgrade your security posture for the long term.

Why you should attend

This assessment is designed to help you understand the importance of security and how to protect your organisation from potential threats. We will also discuss the latest security threats and your organisation can stay aware and ahead of the curve. By attending this engagement, you can:

|			
Engage in hands-on activities to help you gain an understanding of common threat scenarios	Walk away with actionable next steps grounded in industry accepted benchmarks	Get a documented status of organisational defenses against common threats	Better understand how to accelerate your security journey using the latest Microsoft Security tools

[1] *Digital Defense Report 2022, Microsoft*

What to expect:

During this assessment, we'll partner with you to strengthen your organisation's approach to cybersecurity. We'll help you better understand how to prioritise and mitigate potential attacks, with:

- Insights into common cybersecurity threats and the impact they can have on business operations.

- Analysis of your organisation's alignment to common cybersecurity goals and improvement actions designed to help strengthen your posture against human operated ransomware and data leaks from insider threats.

- Visibility into to your endpoint health and Microsoft 365 data using scans from Microsoft Security tools.

- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.

Pre-Engagement Call	Cybersecurity Readiness Assessment	Scope and Definition Meeting	Vulnerabilities and Data Security Exploration	Results Presentation	Engagement Decommissioning
